

```
std::unordered_map  
< std::string, std::  
    string >
```

A diagram showing a relationship between two C++ types. At the bottom is a gray box containing the text `bybit::Args`. A blue arrow points vertically upwards from this box to a white box above it. The white box contains the text `std::unordered_map` followed by a line break, then `< std::string, std::` followed by another line break, and finally `string >`.

```
bybit::Args
```
